Omar Alfawzan

Cloud Technical Lead | Pre-Sales, Architecture & Delivery

contact@oalfawzan.sa +966533553665 Riyadh, Saudi Arabia oalfawzan.sa linkedin.com/in/omarfoz

Summary

Cloud Technical Lead with 8+ years of experience across cloud transformation, pre-sales, solution architecture, and service delivery. Experience spans the full customer journey, from discovery, RFPs, proposals and BoQs through solution design, migration, and managed-services handover. Led the migration of 15,000 email users and 400+ VMs to the cloud, including re-architecture and the application of security and governance standards. Previously managed cloud product portfolios across Public Cloud, DRaaS, Co-location, and FWaaS at Mobily and solutions by stc, and established a Cloud Partnership Program and redefined the Cloud Life Cycle Process at Mobily. Hands-on foundation in IBM Cloud, Kubernetes, Docker, and private cloud, with supporting AI pre-sales experience. Bridges business, architecture, engineering, delivery, and cloud product strategy.

Experience

SITE Riyadh, Saudi Arabia

Cloud Technical Lead Sep 2024 – Present

- Led the migration of 15,000 email users and 400+ virtual machines from on-premises to the cloud, including system re-architecture and the application of security and governance standards throughout.
- Designed and delivered a secure cloud file-sharing platform built to serve 15,000 users reliably.
- Owned cloud delivery end to end - from infrastructure setup to customer handover - covering migrations, professional services, and managed services.
- Owned RFP responses, writing tailored proposals, defining project scope, and creating detailed Bills of Quantities (BoQs) for cloud, professional services, and managed services.
- Led customer discovery meetings, solution design, and technical workshops to align needs with the right cloud solutions.
- Assessed customer AI use cases and their feasibility on cloud platforms to support AI pre-sales.

Mobily Riyadh, Saudi Arabia

DC & Cloud Solutions Principal Mar 2023 – Sep 2024

- Managed Mobily's cloud product portfolio - Public Cloud, DRaaS, Co-location, and custom solutions - keeping offerings competitive and well-positioned in the market.
- Established a Cloud Partnership Program and redefined the Cloud Life Cycle Process, making partner onboarding and service delivery smoother and more consistent.
- Enabled the sales team to position cloud products effectively and win more deals.

solutions by stc Riyadh, Saudi Arabia

Product Manager Sep 2021 – Mar 2023

- Built and launched a Disaster Recovery as a Service (DRaaS) product on the stc cloud platform, taking it from initial concept all the way to market launch.
- Managed a portfolio of cloud products - Virtual Data Center, Co-Location, and FWaaS - covering vendor management, customer billing, revenue tracking, business case development, budget requests, service performance, and customer satisfaction.
- Equipped the sales team with technical knowledge and insights, and improved products based on customer feedback and market trends.

solutions by stc Riyadh, Saudi Arabia

Business Development Specialist Aug 2019 – Sep 2021

- Analyzed competitors and market trends to position cloud and IoT products more effectively.
- Tracked product performance and proposed improvements to support adoption and service quality.
- Built forecasts, pipeline reports, and data analysis to support business decisions.
- Managed cloud service partners within the stc marketplace to grow the partner ecosystem.
- Organized 35+ meetups and webinars for the Cloud and IoT portfolio, building community and raising product awareness.

IBM Riyadh, Saudi Arabia
Developer Advocate Jul 2018 – Jul 2019

- Hosted 15+ workshops and mentored developers across 35+ workshops for community developers and enterprise customers on IBM Cloud, microservices, Kubernetes, Docker, Cloud Foundry, Watson Assistant, and related cloud technologies.
- Engaged with 7+ customers on IBM Cloud Private, Watson Assistant, and mobile development use cases.
- Installed IBM Private Cloud for a Saudi banking customer using RHEL 7, Docker, and Kubernetes, including deployment of IBM and third-party applications.
- Built a customer chatbot using Watson Assistant, Node.js, and Telegram.

Education

King Saud University Bachelor's degree • 4.59/5
Computer Information Systems Aug 2014 – May 2018
